### **Academic Projects:**

- ❖ Submitted a mini-project in first year titled “**scientific calculator**” using language **c**. This is basic scientific calculator that students use in daily life. This is virtual model of scientific calculator. 2012-13
- ❖ Submitted a mini-project in second year titled “**student report card**” using language **c++**.this is a simple application developed using c++ for storing student details and generate a report card. 2013-14
- ❖ Submitted a major project as a team lead in final year of my under graduation. We have made an web application named “**Student Information System**” which helps any college/university to easily maintain student records and also help students to easily view their records. 2015-16
- ❖ Currently working on a project named “**Course buddy**”, an android application, which would help the user to directly interact with their co-students in a course, tutors and teaching assistants. This would reduce the gap between student and teacher, providing a student a path to enhance his skills. January 2017-till date
